

NetUtils **Capabilities** Matrix

The foundation stone of our business is our technical arm. Our team hold top tier accreditations from key vendors such as Juniper Networks, Pulse Secure, Fortinet and Palo Alto Networks, alongside extensive CISSP, CISM expertise and high-level security clearances.

When you work with NetUtils, you're combining our skills and experience with those of our extensive specialist partner network.

ACCEDIAN

Performance assurance and visibility platform

Full visibility across network services and application chains, spanning virtualised, cloud, software-defined, and physical infrastructure - empowers service providers and enterprises engaged with digital transformation to realise business goals and strengthen their competitive position.

CATO

NETWORKS

SD WAN solution and MPLS alternative

Enabling enterprises to efficiently and securely connect all branch locations, the mobile workforce, physical and cloud data centres, into a global, encrypted and optimised software-defined and cloud-based secure enterprise network.

Extreme

Wired and wireless network solutions

Combining world-class products with a global perspective to build nimble networks that deliver a tighter connection with customers and a stronger bottom-line. Extreme improves digital transformation, innovation, and customer experience - from the enterprise edge to the cloud - with software driven-solutions that are agile, adaptive, and secure.

FORTINET

Firewalls, end-point protection and other security solutions

Enables organisations to achieve a security-driven network with the highest-performing firewalls, innovative product portfolio, and deep integration with the Security Fabric and trusted partners to reduce complexity and protect the entire network from sophisticated threats.

Infrascale

Disaster recovery and cloud backup provider

An enterprise-grade disaster recovery solution that provides rapid failover to a second site with the flexibility to boot from the appliance or cloud. Delivered as a physical or virtual appliance and includes DR software - it's DR, your way.

JUNIPER

NETWORKS

Steel-Belted Radius, firewalls, switching & routing, end-point protection and other security & networking solutions

Provides high-performance networking & cybersecurity solutions for organisations of all sizes. Simplifying the network with secure and automated multi-cloud solutions, delivering applications at cloud scale with built in automation, intelligence and security.

KnowBe4

Human error. Conquered.

Security awareness training platform and managed service

The world's largest security awareness training and simulated phishing platform that helps organisations manage the ongoing problem of social engineering. Keep your users on their toes with security top of mind, with an integrated platform to train and phish your users.

Mist

A Juniper Company

Wireless LAN platform

The Mist platform is an innovative approach to wireless that combines AI, machine learning, and data science with the latest cloud technologies. It delivers a smart, agile, and scalable solution that optimises the wireless experience and brings insight into the network.

Office 365

Licencing, implementation, training & security management

A line of subscription-based services offered by Microsoft. NetUtils ensures our customers are able to maximise Office 365 in the context of your business as well as ensuring security, network performance, visibility access and backups are also taken care of.

paloalto

NETWORKS

Firewalls, end-point protection and other security solutions

Built for simplicity, Palo Alto Networks prevents attacks with the industry-defining network security platform. Tightly integrated innovations, easy to operate, for consistent protection across network, cloud and mobile users.

PCSYS

Vulnerability scanning & penetration testing

An automated penetration-testing platform that mimics the hacker's attack - automating the discovery of vulnerabilities and performing ethical exploits, while ensuring an uninterrupted network operation. Reports are produced together with proposed remediations, one step ahead of tomorrow's malicious hacker.

Pulse Secure

Remote access and security solution

Focused on delivering secure access solutions for people, devices, things and services. For years organisations of every size and industry have been using their integrated virtual private network, network access control and mobile security solutions to enable secure access seamlessly.

SKOUT

CYBERSECURITY

Security operations centre services

Cyber risk is hard to explain, difficult to see and expensive to manage. Skout makes it easy to see your risk and makes cyber affordable. NetUtils offers this as fully managed security operations centre services, focusing on security monitoring, endpoint and email protection.

thycotic

Privilege access management solution

Privileged account passwords and endpoints are the primary targets of hackers. Thycotic secures passwords, protects endpoints and controls access. Thycotic automatically improves privileged account password management, security, and compliance without impacting productivity.
